EXPERIENCE

Dash Solutions Architect

[Plotly](#) - provides online graphing, analytics, and statistics tools and web frameworks for individuals and collaboration

📅 February 2020 – Present 📍 Montréal, Canada

- Develop Dash applications using the full-stack Dash Enterprise framework for internal use and external customers for industries including finance, government, and supply chain
- Contribute to both Plotly's open- and closed-source software projects and work with tools including Plotly, Dash, React, Apache Spark, Redis/Postgres
- Public facing apps include a [nursing home COVID monitor](#).

Research Assistant

[.txtLab](#) - a laboratory for cultural analytics at McGill University

📅 October 2018 – May 2020 📍 Montréal, Canada

- Designed and oversaw a .txtLab project to study the salient language of disagreement and consensus building on Wikipedia
- Work culminated in a white paper, "Everyday Specialization on Wikipedia", which was published in September 2020.
- Project overseen by Profs. Andrew Piper and Richard Jean So

Research Assistant

[The Riddle Project](#) - a ROAAr project dedicated to transcribing, solving, and researching riddles found in early manuscripts

📅 April 2019 – April 2020 📍 Montréal, Canada

- Built a website and several geospatial web apps at riddleproject.github.io to illustrate riddle movement over time using MapBox
- Project overseen by Prof. Nathalie Cooke

Research Assistant

[Montréal Computational & Quantitative Linguistics Lab](#) - a laboratory to study fundamental questions about language acquisition, processing, use in society, and change over time

📅 November 2019 – May 2020 📍 Montréal, Canada

- Collaborator for a project studying patterns of productivity and reuse in language including designing an algorithmic implementation of a qualitative model for productivity
- Project overseen by Prof. Timothy O'Donnell

AWARDS

Arts Undergraduate Research Award

Given to support undergraduate students who undertake research during the summer under the direct supervision of a faculty member
\$4,000 grant for work with .txtLab, 2019
